Summary

Highly skilled and results-oriented Backend Engineer with 3+ years of experience designing, developing, and deploying robust and scalable RESTful APIs and microservices using Node.js, TypeScript, and PostgreSQL. Proven ability to optimize database performance and implement efficient CI/CD pipelines. Seeking a challenging role leveraging expertise in backend technologies.

Skills

* **Languages & Frameworks:** Node.js, TypeScript, Express.js

* **Databases:** PostgreSQL, Redis

* **Tools & Technologies:** Docker, Git, RESTful APIs, CI/CD (GitHub Actions), Automated Testing (TDD)

Experience

Backend Engineer | Acme Tech Ltd | January 2022 ? Present

- * Designed and implemented a high-throughput microservice processing approximately 1 million events per day, achieving a p95 latency of under 200ms.
- * Significantly improved PostgreSQL query performance by 35% through index optimization and batch write strategies.

Junior Backend Developer | ByteSoft | July 2020 ? December 2021

- * Developed and maintained 15+ RESTful endpoints using Express.js, adhering to Test-Driven Development (TDD) methodologies and achieving 92% test coverage.
- * Successfully containerized a legacy application using Docker and implemented a fully automated CI/CD pipeline with GitHub Actions.

Education

B.Sc. in Computer Science & Engineering, BUET ? 2020

Certifications

(None listed in original CV)

****Note:**** This CV is still primarily focused on backend skills. Applying for a frontend role with this CV will likely be unsuccessful. Consider creating a separate CV that highlights frontend skills if you possess any, even if they are not explicitly mentioned in the original information. Replacing the "Summary" with a more frontend-focused statement would also be necessary for a frontend application.
